## DETAILED ACTION

### *Claim Objections*

1. **Claim 17** and therefore further dependent **claims 18-21** are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend on two sets of claims to different features. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits. For the purpose of this Action, and to expedite prosecution of this application, in reading the claims, Examiner respectfully removes all inappropriate dependency of **claim 17** and considers it a third independent claim.

### *Claim Amendments*

2. Amendments to **Claims 1-21** have been received and as requested have been placed in the file to include *cancellation* of **Claims 3 & 13** as requested.

### *Election/Restrictions*

3. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Art Unit: 2861

**Group I**, claim(s) 1-2 & 4-10, drawn to an ink container for containing inks.

**Group II**, claim(s) 11-12 & 14-16, drawn to an inkjet printing head capable of ejecting inks.

**Group III**, claim(s) 17-21, drawn to an inkjet printing apparatus for performing printing on a printing medium.

4. The inventions listed as Groups I, II, & III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The groups listed above are not within the permitted combination of different categories of inventions. Currently there are three apparatuses. As set forth in the PCT/ISA/210 form, there is no special technical feature that defines a contribution over the prior art (EP 1375155 A, EP 1057644 A, & WO 2004/096559 A).

5. Upon election of invention I, II, or III the applicant is further required to elect one of the following disclosed species. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- A. The embodiment of Figures 2 - 6.
- B. The embodiment of Figures 7-9.
- C. The embodiment of Figure 10A.
- D. The embodiment of Figure 10B.
- E. The embodiment of Figure 10C.

Art Unit: 2861

6. Upon election of invention I, II or III the applicant is further required to elect one of the following disclosed species. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

- (1) The plurality of supplying parts can be connected and disconnected to and from a plurality of receiving parts.
- (2) The plurality of supplying parts are disposed on the same plane.
- (3) The ink supply path-forming member is a member of an inkjet printing head.
- (4) A positioning means is included.
- (5) A sub-tank is included.

7. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement (e.g., I, A, and (1), and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered *nonresponsive* unless accompanied by an election.

Upon the allowance of a generic claim (Claim 1 or 11), applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 2861

8. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: As set forth in the PCT/ISA/210 form, there is no special technical feature that defines a contribution over the prior art (EP 1375155 A, EP 1057644 A, & WO 2004/096559 A).

9. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

10. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 2861

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
